

NISHI SANJAY PANCHOLI

nishipancholi98@gmail.com | (551)335-8224 | [Linkedin](#) | [Portfolio](#) | [Github](#)

SUMMARY

Software Engineer with 2.8 years of full stack experience developing scalable web applications and dynamic UIs using React, JavaScript, and TypeScript, alongside backend systems with Node.js, Java, and Python. Skilled in building modular RESTful APIs and proficient in unit, integration, and automated testing using Jest, Mocha, and JMeter. Experienced in CI/CD automation and managing AWS services including EC2, S3, RDS, and CloudWatch. Effective contributor in Agile teams, leading code reviews and collaborating with cross-functional teams to deliver high-quality software.

EDUCATION

Master of Science, Information Systems
Northeastern University, Boston, MA

Jan 2023 - May 2025

Bachelor of Engineering, Information Technology
University of Mumbai, Mumbai, IN

Aug 2017 - Sep 2020

TECHNICAL SKILLS

Programming Languages Java, Python, JavaScript, TypeScript.

Full Stack Development: HTML, React, Angular, Node.js, Express.js, Spring Boot, Django, PHP, RESTful APIs, GraphQL.

Databases: PostgreSQL, MySQL, MongoDB, Airtable, AWS RDS, DynamoDB.

Cloud Platforms & Infrastructure: AWS, Pulumi, Terraform, Docker, Kubernetes, Vercel, Serverless Framework.

Testing, Automation: Jest, Mocha, Postman, JMeter, GitHub Actions, CI/CD Pipelines, Unit Testing, TDD.

Development Tools & OS: Git, GitHub, Jira, Figma, DOM, Agile/Scrum Methodologies, Windows OS, Linux.

WORK EXPERIENCE

Software Engineer Intern | Onyva Solution | Boston, MA

Jan 2024 – Sep 2024

- Built scalable pet services platform from PHP/Laravel to MERN stack using React JS, Redux, ExpressJS, integrating Java based RESTful APIs and optimizing data flow, reducing backend response time from 1.2s to 250ms.
- Utilized highly available AWS infrastructure (EC2, RDS) with Terraform (IaC) and CloudWatch monitoring, enabling fault tolerant CI/CD deployments with near 0 downtime.
- Orchestrated real-time flow using GraphQL and WebSockets with Product and UX teams, increasing feature adoption by 40%.
- Designed a Python based booking algorithm reducing idle time by 30%, integrating legacy Laravel APIs with Node.js backend.
- Automated unit and integration testing with Jest, Postman, and Cypress, enhancing code stability thus accelerating release.
- Acted as a key liaison between cross functional teams in Agile sprints, mentoring new interns and conducting code reviews.

Software Engineer | LTI Mindtree | Mumbai, IN

Jan 2021 – Dec 2022

- Administered contributor portal frontend using React Native, JSON and JavaScript, optimizing workflow automation to accelerate editorial outputs by up to 30% across 279+ publication houses.
- Developed backend Java REST APIs and optimized MongoDB and PostgreSQL workflows, improving data retrieval speed and system scalability to handle 6.3M assets efficiently enabling version control using Git and agile development using JIRA.
- Delivered insurance portal, ensuring secure financial data management for 8+ clients through Okta-based authorization.
- Established automated CI/CD pipelines, reducing operational costs by 25% and accelerating deployment frequency.
- Implemented test-driven development with unit and integration testing using MochaJS and Jest, enhancing system reliability.
- Led technical evaluations and solution design discussions, collaborating with business teams to drive informed decisions.

PROJECTS

Portfolio | Next.js, NodeMailer, Typescript, Tailwind, Domain DNS

April 2025-Present

- Framed responsive personal portfolio using Next.js, TypeScript, Tailwind CSS, and Framer Motion, deployed on Vercel for serverless deployment utilizing DNS and integrated a serverless contact form powered by NodeMailer.

Cloud Hosted Web Application | AWS, EC2, RDS, Pulumi(IaC)

Sep 2023-Dec 2023

- Deployed backend application with REST APIs for CRUD operations on AWS with API Gateway, using GitHub Actions for CI/CD, automating testing with Jest and AMI creation for zero downtime deployments.
- Provisioned cloud infrastructure using Pulumi/HashiCorp (IaC), including VPC, RDS, Application Load Balancer, CloudWatch Logs, Alarms, Metrics, DynamoDB, and auto-scaling EC2 instances to ensure seamless scalability.
- Configured CloudWatch alarms and auto-scaling policies to dynamically manage EC2 instances based on CPU utilization.
- Integrated SNS and Lambda for event-driven processing, automating email notifications and DynamoDB updates.

Digital Asset Management Website | React JS, JavaScript, Git, Jenkins

Jan 2021- Dec 2021

- Formulated responsive web and mobile platform for managing digital assets, integrating seamless version control with Git and automated deployments via Jenkins for efficient CI/CD workflows.
